

## QUALITY POLICY

Keldin Engineering Ltd are totally committed to the principles and practice of excellence and will conform to the requirements of the ISO 9001:2015 Quality Management System Standard. We are committed to:

- Ensuring the policy is appropriate to the purpose and context of the organisation and supports its strategic direction.
- Satisfies applicable requirements, customer requirements and regulatory and/or legal requirements.
- Ensuring that the requirements of all interested parties are clearly understood so that our services can be delivered in a timely and professional manner.
- Planning and establishing measurable objectives based on its Quality Policy for the ongoing development of the company and its customers. These objectives are regularly reviewed and measured by management.
- Produce project solutions which are economic, practical, socially responsible and compatible with the brief.
- Continual improvement of the Quality Management System which comply, to relevant Legislation and in house programs in order to pursue quality of service.
- Ensuring that our customers are fully satisfied with the service we provide.
- Ensuring that the company's entire workforce is given sufficient training and development support to provide for fully competent staff.

This policy shall be controlled and maintained as part of our Quality Management System. It will be available to interested parties on request.
